Lab 2: Agile Backlog Creation & Sprint Simulation in Jira

Problem Statement 51 - Virtual Technical Conference Platform

Name: Bhavesh

SRN: PES1UG24CS115

Dept. of CSE, PES University

Jira Project/Workspace Link:

https://bhaveshvelluru.atlassian.net/jira/software/c/projects/L2/boards/4/backlog

Contents:

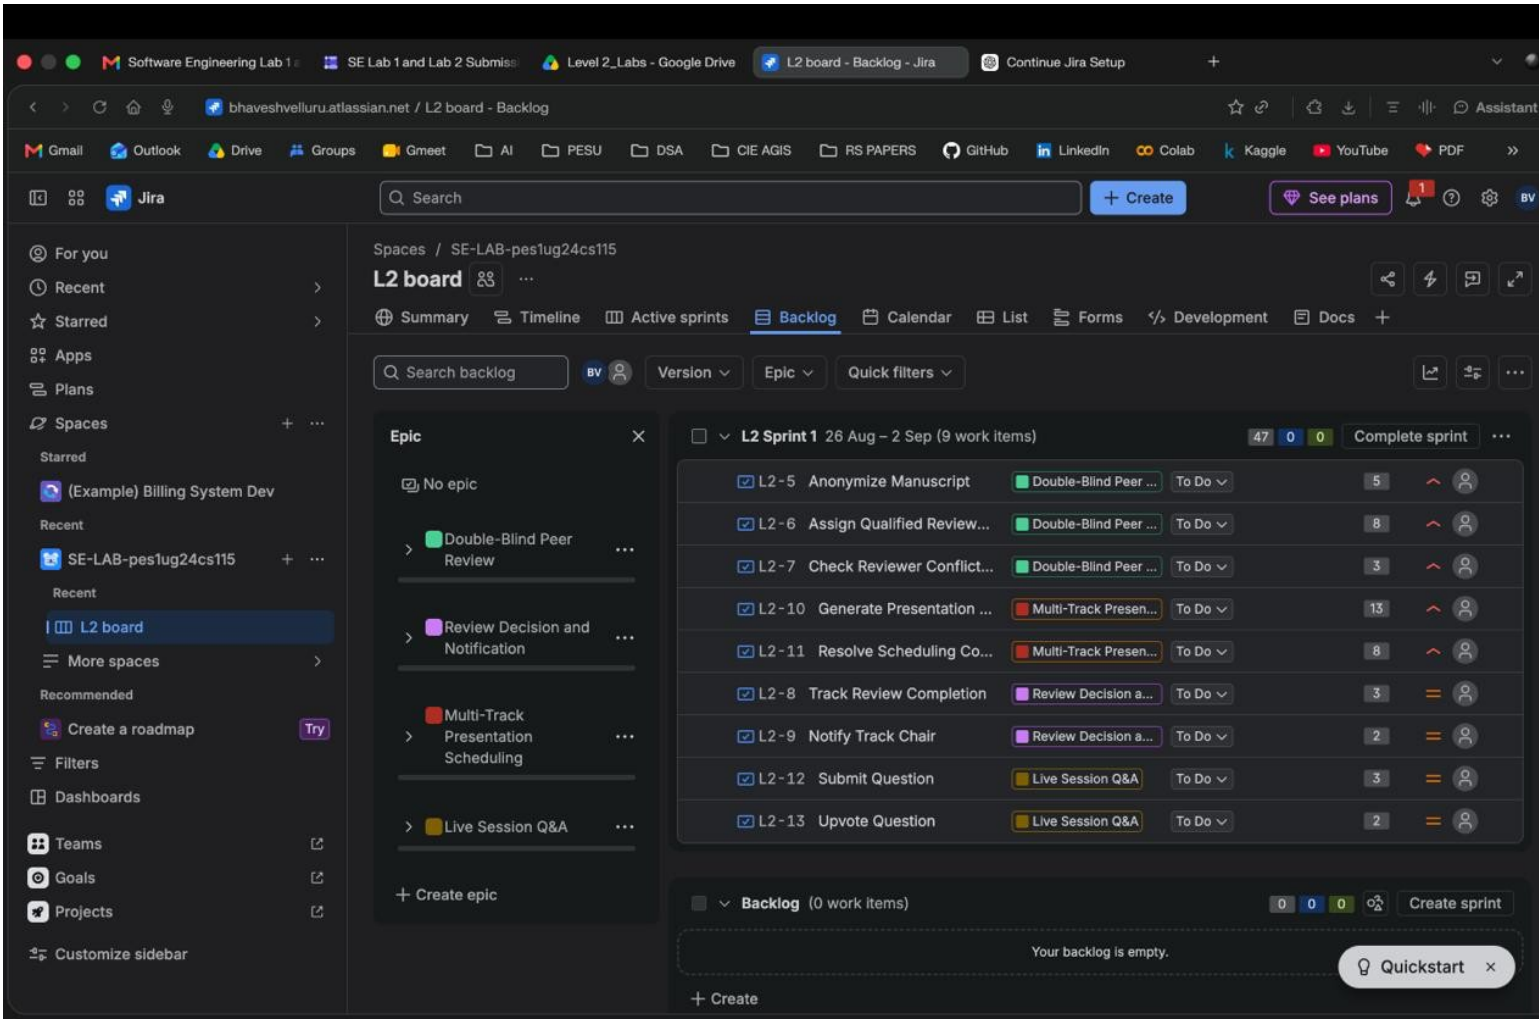

1. Epics & User Stories / Backlog (incl. Story Points)

2. Active Sprint Board

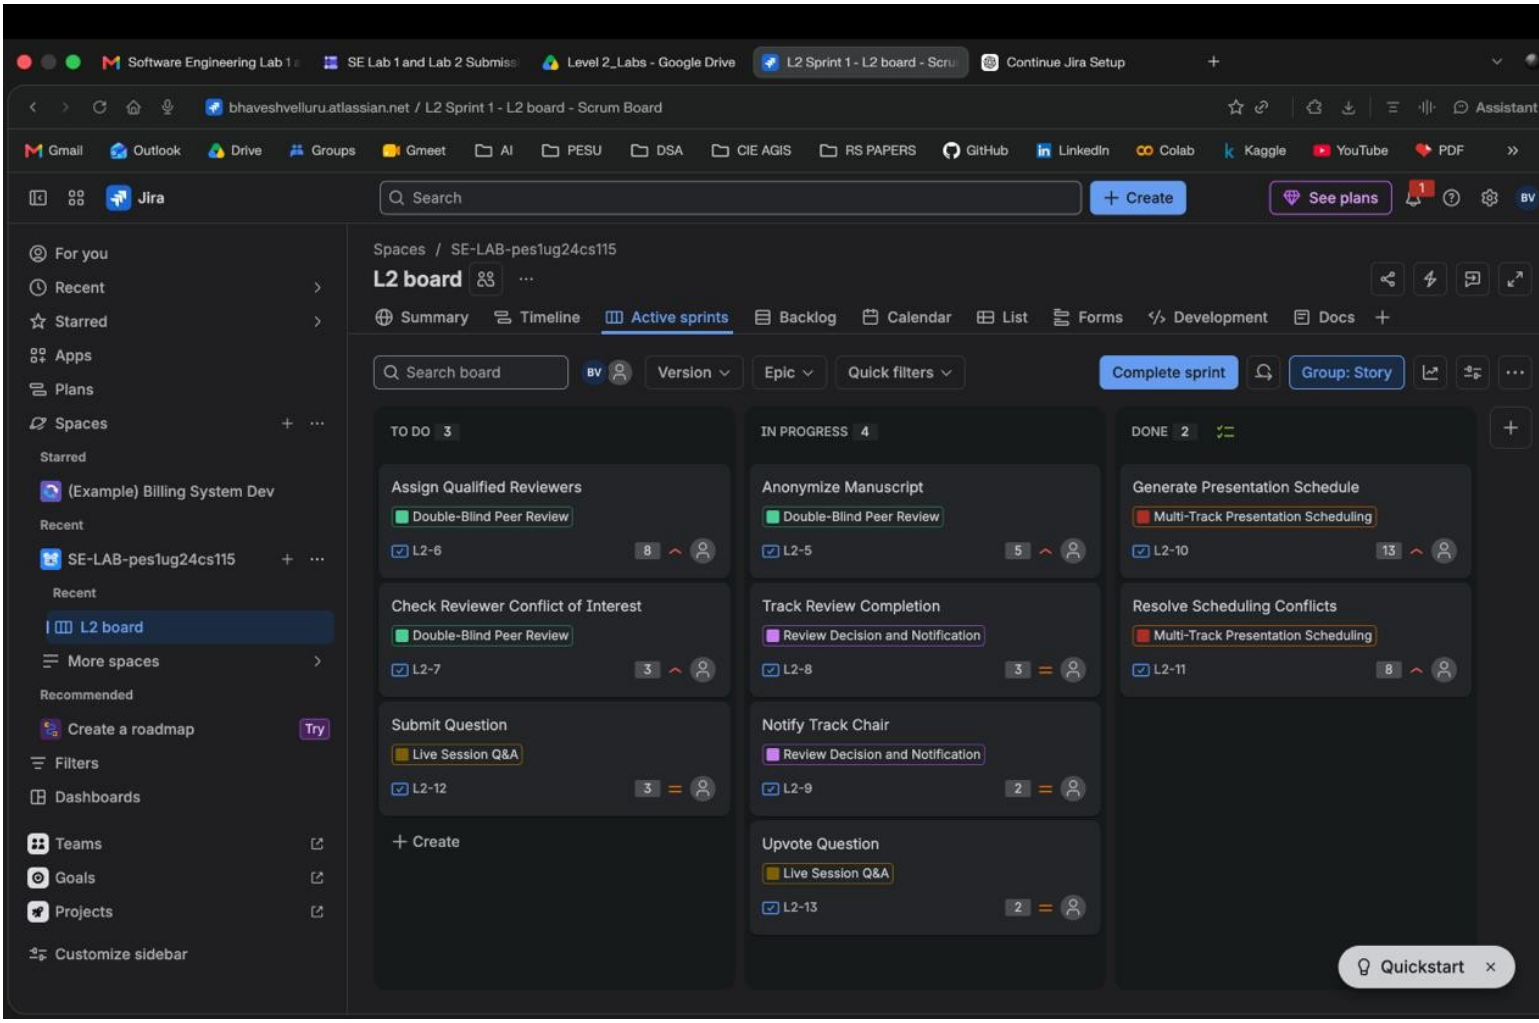

3. Burndown Chart

4. Reflection Questions

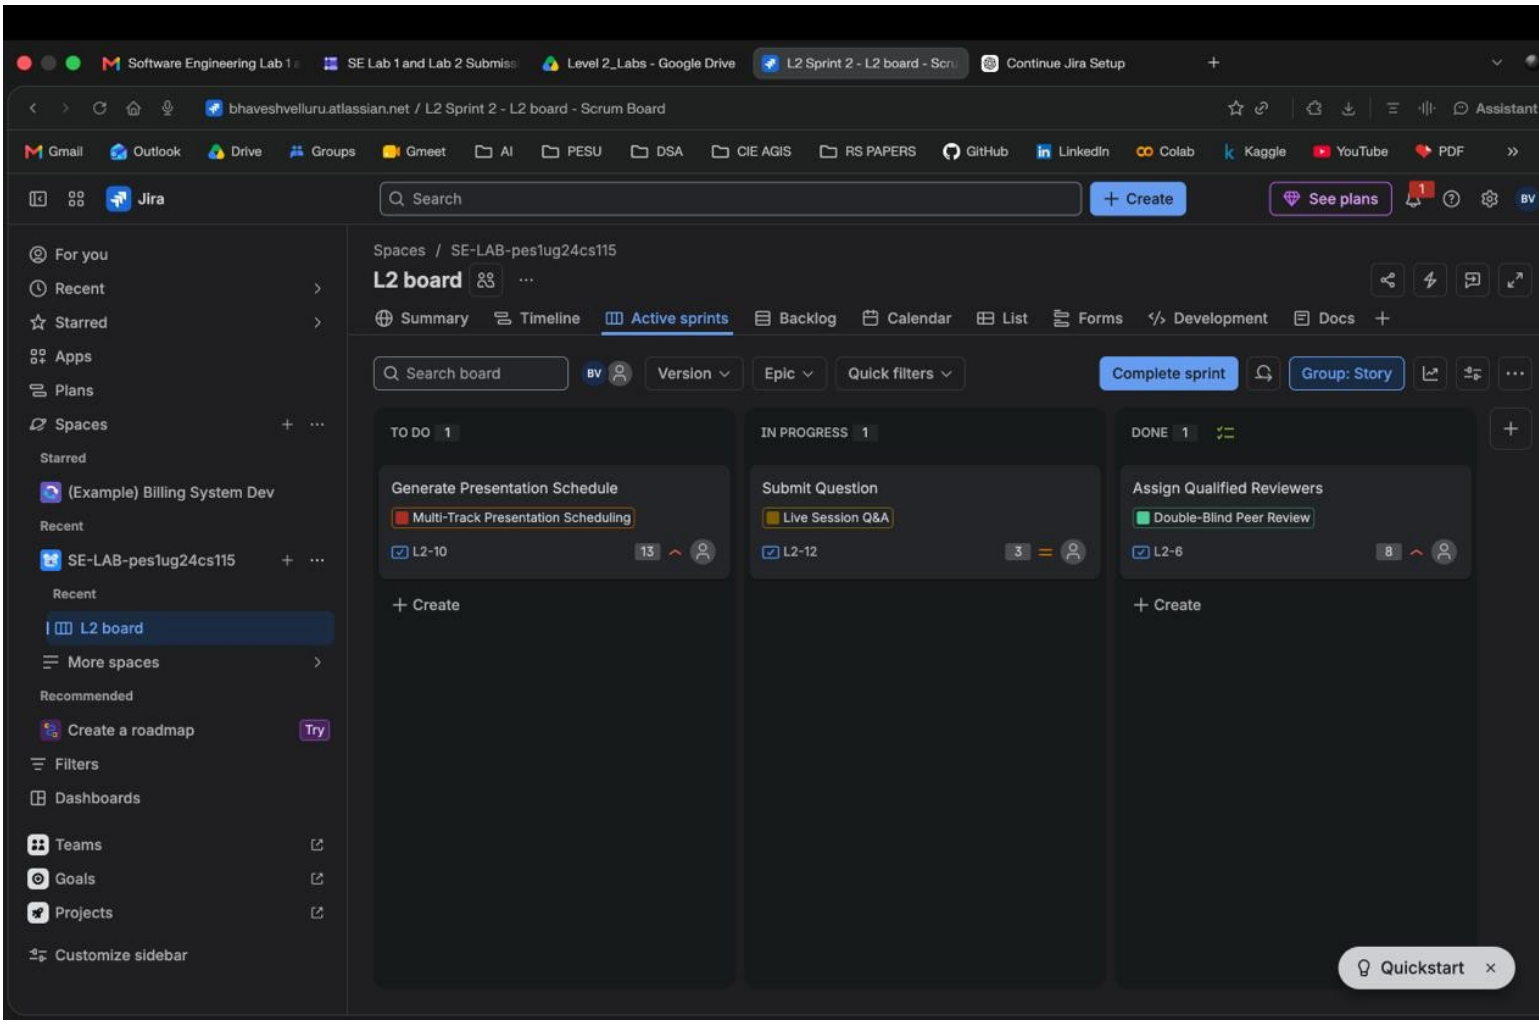

Epics & User Stories / Backlog (incl. Story Points)

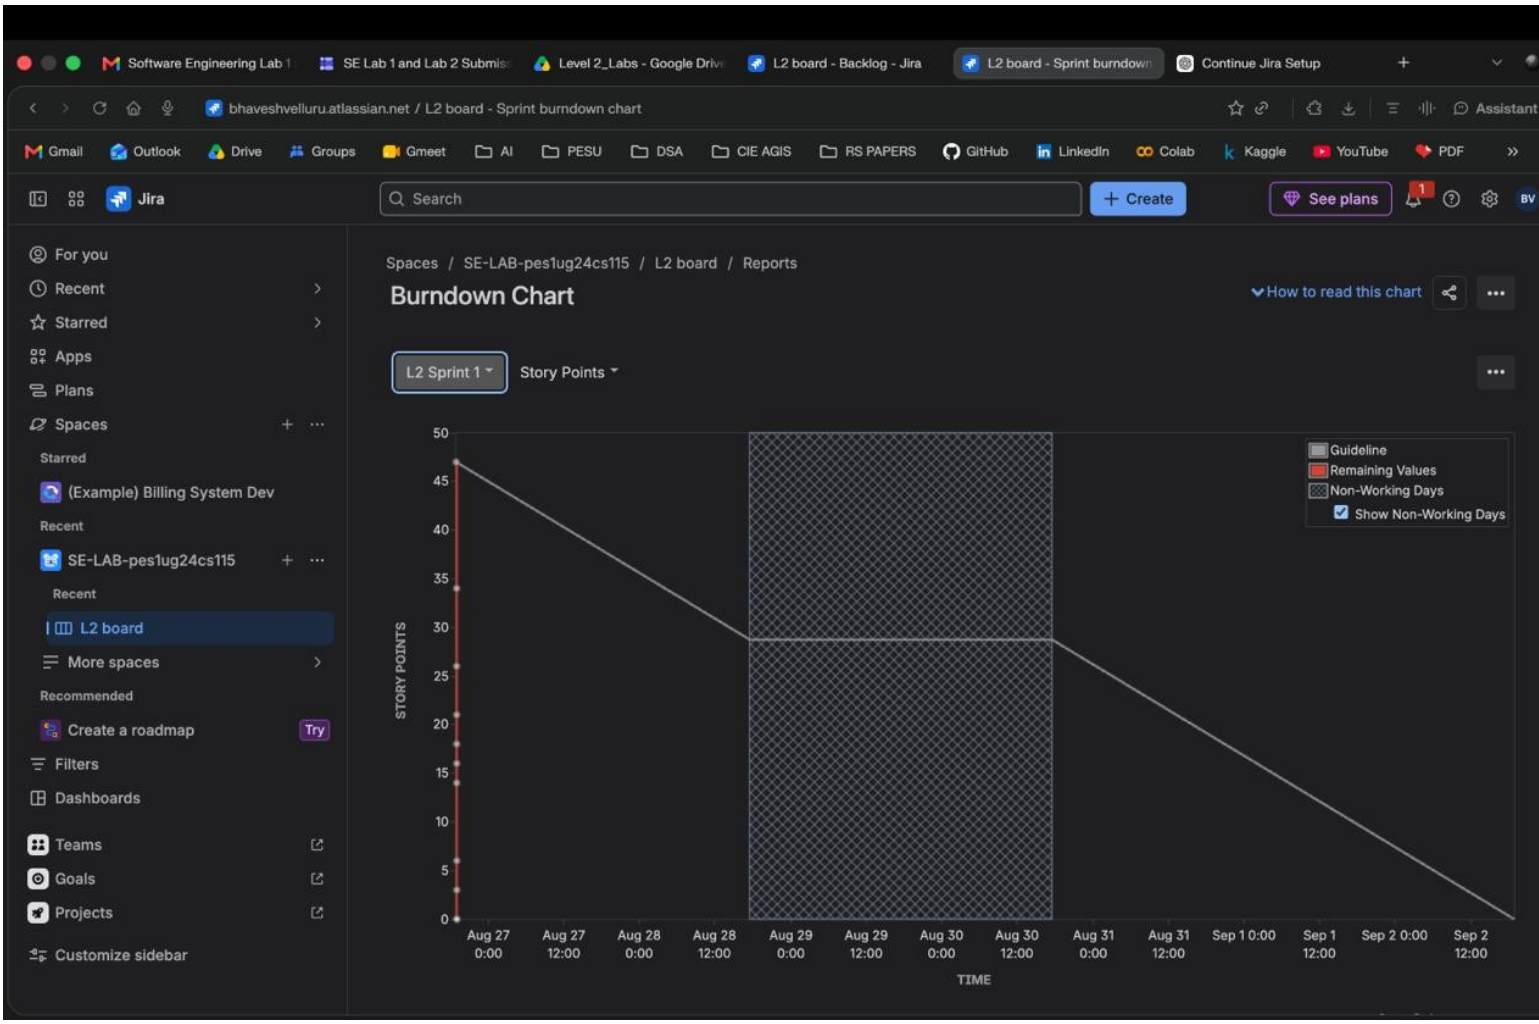

Active Sprint Board

Active Sprint Board (continued - Sprint 2)

Burndown Chart

Reflection Questions

1. Did your estimations reflect the actual effort?

Yes, the estimations were mostly reasonable. The bigger tasks were given more story points, while the simpler tasks were given fewer points. Since the sprint was simulated, the actual effort was not measured exactly.

2. Was your backlog well-prioritized?

Yes. The important features like manuscript anonymization, reviewer assignment, conflict checking, and scheduling were given high priority. Other features like Q&A were given medium priority.

3. How did your simulated sprint align with your plan?

The sprint followed the planned backlog. We moved the stories from To Do to In Progress and then to Done. The tasks were completed according to their priority.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed how the remaining story points decreased as tasks were completed. It showed that the planned work could be completed within the sprint. Since this was a simulation, the progress was faster than it would normally be in a real project.
